Academic Costume

The Academic costume, which originated at Oxford and Cambridge Universities in England in the 1300's, has been in use in the United States since colonial days, although not until the 1890's was there a decided movement toward greater use of academic costume by senior classes, trustees and faculties.

Gowns and Caps: The bachelor's gown is relatively simple, with long, pleated front panels, and intricate shirring across the shoulders and back. The gown is worn closed and is distinguished by its long, pointed sleeves.

The master's gown has the same yoke effect but is designed to be worn open. It has a very long sleeve, oblong in shape with arc cut out of the bottom of the front. The oblong is closed at the base and the forearm protrudes through a notched slit at the elbow.

Gowns for the doctor's degree are also designed to be worn open, but carry five-inch wide velvet panels draped around the neck which carry all the way to the bottom of the garment. Three horizontal velvet bars are stitched on the upper arm of the full, round, bell-shaped sleeves. This velvet trimming may be either black or the color distinctive of the faculty to which the degree refers.

The mortar board cap, proper for all degrees, is worn both indoors and out upon all occasions when gowns are used. The tassel, gold for the doctorate degree and black for all others, is worn on the left front quarter of the cap top.

Hoods: The hood is the most distinguishing feature of all academic costumes. Originally, it seems to have had three uses: As a hood covering, as a shoulder cape, or, when hung from the shoulder, as a bag in which alms could be collected.

The size and shape of the American hood marks the college degree of the wearer. The hood's outside is bordered with velvet of the proper width to indicate the degree and the proper color to indicate the department or field of study. Thus, a degree conferred as Bachelor of Arts requires the white of Arts, Letters and Humanities, whereas, the Bachelor of Science degree requires the yellow of Science.

The shape of the bachelor's hood and the master's hood is similar, the former being three feet in overall length and the latter three and one-half feet. The doctor's hood has a base which is rounder and has an overall length of four feet. The respective widths of the velvet borders are two inches for the bachelor's, three inches for the master's and five inches for the doctor's hoods. The colored lining on the inside of the hood is the official color or colors of the institution conferring the degree. Where there is more than one color, the second color is usually represented by a chevron, a wide stripe across the background color, or field. Thus, the inside of the Middlebury hood has a blue background with a white chevron.

Members of the governing board of the degree-conferring institution normally wear the doctor's gown, but their hoods represent only such degrees as are actually held.
